

RAHUL MAURYA

Full Stack Developer | MERN Stack | AI Integration Enthusiast

Ghaziabad, Uttar Pradesh | +91-9580015891 | mrahul20660319@gmail.com | LinkedIn | GitHub | Leetcode

Summary

Aspiring Full Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js) with hands-on experience designing and deploying AI-integrated web applications. Proficient in JavaScript, TypeScript, Next.js, and Tailwind CSS, with a strong foundation in data structures, algorithms, and system design (250+ problems solved on LeetCode). Seeking an internship or full-time Software Engineer role to build scalable, user-focused products.

Education

Bachelor of Technology in Information Technology

2023 – 2027 (Expected)

IMS Engineering College, Ghaziabad

Technical Skills

- **Programming Languages:** C, Java, Python, JavaScript, TypeScript
- **Web Technologies:** HTML, CSS, React.js, Next.js, Node.js, Express.js, Tailwind CSS
- **Databases:** MongoDB, MySQL, REST API
- **API Security:** REST APIs, JWT Authentication, Prompt Engineering, API integration
- **Core CS Concepts:** Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, Computer Networks
- **Developer Tools:** Git, GitHub, VS Code, Vercel, Postman, claude.ai, Antigravity

Experience

Full Stack Developer

Designed and deployed 4 full-stack MERN applications using React.js, Node.js, Express.js, and MongoDB with responsive UI and secure authentication.

Integrated OpenAI, Cloudinary, Clerk Authentication, and REST APIs to implement AI-powered image generation, authentication, and media management.

Developed responsive user interfaces using React.js, Next.js, and Tailwind CSS, improving usability across desktop and mobile devices.

Used Git and GitHub for version control, pull requests, and collaborative development workflows.

Projects

ECHO — Open-Access Mental Health & Community Support Platform

bulletlist

ECHO is a mental wellness and emotional support web application that provides users with a safe and interactive platform to monitor their mood, chat with an AI-inspired companion, explore motivational content, and access relaxation resources through a modern, responsive user interface.

Designed and developed a responsive mental wellness web application using React.js, Vite, Tailwind CSS, and React Router, incorporating mood tracking, AI-inspired chat, reusable React components, SPA architecture, responsive design, and Git-based version control.

Imagify — AI Image Analyzer

bulletlist

Built an AI-powered image analysis application using React.js and Clerk authentication, integrating the Clipdrop AI API via asynchronous calls for real-time content recognition.

Implemented React Router and Context API to deliver a seamless single-page application experience with responsive design across devices.

AI Image Generator

bulletlist

Engineered a full-stack MERN application integrated with the OpenAI API, enabling text-to-image generation with metadata persistence through a custom RESTful backend.

Developed a responsive community showcase using React.js and Tailwind CSS, leveraging Cloudinary for optimized storage and real-time rendering of AI-generated assets.

Achievements & Certifications

- Solved 250+ Data Structures & Algorithms problems on LeetCode; active participant in coding contests and technical communities.
- Continuously building real-world full-stack projects to strengthen system design and production-engineering skills.
